Subject: Updated writeup of description of item sampling approach?
Attachments: Statistical analysis of confidence using VSP approach v2 2-16-2018.docx

Dear Donna,

Thank you for the writeup you did 1/19 incredibly quickly. My management has requested an updated version to give the managers in other agencies. Since 1/19, I asked you to do other scenarios. So I have taken the liberty of editing your previous writeup to update it and also made a few style suggestions in the attached. Please let me know what you think. I also wanted to ask if you could do some sensitivity analysis on how much difference it makes if targeted is 3X or 4X more likely to be unacceptable vs. random.

Could we get this from you the week of 2/20? I would appreciate it. Thanks!

Lily
